Professional Summary

Java Developer with **1.5+ years of experience** designing, developing, and maintaining backend applications using **Java, Spring Boot, Spring MVC, and RESTful APIs**. Hands-on experience building **REST APIs that integrate multiple service modules** within Hitachi's Cash Management Business System (CBS), including secure authentication (2FA), transaction-authorization workflows, and reconciliation logic. Comfortable across the **full SDLC in Agile**, cross-functional teams, with a strong foundation in **Core Java, OOP, SQL Server/MySQL, and Git**. Looking to bring this backend and API-integration experience to a Java Developer role building scalable, distributed applications.

Technical Skills

- **Languages:** Java, Java 8, SQL
- **Frameworks:** Spring Boot, Spring MVC, Spring Data JPA, Hibernate
- **APIs & Architecture:** RESTful API, JSON, multi-module/service-based integration, Authentication & Authorization, 2FA
- **Database:** SQL Server, MySQL, query optimization, schema design
- **Tools & Version Control:** Git, GitHub, Maven, Postman, IntelliJ IDEA
- **Practices:** OOP, Collections, Exception Handling, Java 8 Features, SDLC, Agile, Code Reviews
- **Currently Upskilling:** Docker, Kubernetes, Microservices architecture patterns, Cloud fundamentals (AWS)

Professional Experience

Hitachi Cash Management Services Pvt. Ltd.

Mumbai, India

Java Backend Developer | Dec 2024 – Present

- **Developed and maintained** backend modules for the **Cash Management Business System (CBS)**, an enterprise application supporting cash logistics and financial transaction workflows, using **Java, Spring Boot, REST APIs, Spring Data JPA, Hibernate, and SQL**.
- **Designed and built REST APIs** enabling real-time data exchange across **50+ CBS modules**, supporting DCV tracking and authorization workflows – functioning as the integration layer between independently maintained service modules.
- **Implemented Two-Factor Authentication (2FA)** for user login, strengthening application security and reducing unauthorized-access exposure by **65%** users using similar logins.
- **Developed and enhanced the DCV (Dedicated Cash Van) module**, automating vehicle-movement tracking, KM calculation, and travel-time analysis – cutting manual trip-monitoring effort by **45%**.
- **Built multi-step cash-authorization and validation workflows**, reducing transaction-approval turnaround time by **50%** while enforcing business-rule compliance.
- **Resolved cash-mismatch and reconciliation issues** for railway clients, improving reconciliation accuracy by **75%** and shortening audit-resolution time by **5 days**; **optimized SQL queries and table design**, cutting report-generation time by **50%**.
- **Diagnosed and resolved 45+ production and backend issues** per month by analyzing logs, API responses, and database records within an **Agile SDLC**, collaborating with cross-functional QA and business teams.

Education

Bachelor of Science in Information Technology (B.Sc. IT)

2024

University of Mumbai – Sathaye College, Mumbai

CGPA: 7.67/10

Projects

Hotel Management System – Java Spring Boot

- Built a RESTful backend for hotel booking and admin management using **Spring Boot, Spring Data JPA, and MySQL**; added room-availability validation, global exception handling, and optimized JPA queries, cutting query response time by **50%**.

Expense Tracker – Java Spring Boot

- Built REST APIs for expense CRUD operations, category-wise tracking, and automated monthly summary reports using **Spring Boot, Spring Data JPA, and MySQL** added role-based authentication and **Two-Factor Authentication (2FA)** to secure user accounts.

Attendance Management System – Java Spring Boot

- Built a role-based attendance management system with authentication and REST APIs using **Spring Boot and Spring Data JPA**, supporting daily attendance tracking and reporting.
